

SOLAR SHADES EXTERIOR SHADE

... block the sun's heat, add privacy and save energy

Better by design

Solar Shades help control the sun from the outside!

Studies show that the **MOST EFFICIENT** way to block the sun's heat is from the **OUTSIDE** - before it has a chance to heat the window glass. Our solar shades block the sun's heat while maintaining VISIBILITY to the outdoors. Solar Shades can pay for themselves year after year by reducing energy bills and protecting furnishings from harmful UV rays that cause fading.

- Exterior shades glide along stainless steel rods, cables or tracks
- Our **unique Zipper System** provides up to 100% black-out and bug protection with select fabrics
- Motorized options to adjust each shade independently
- You control how much light enters your space - select from three fabric styles: solid acrylic fabric, fiberglass mesh or PVC coated polyester
- Shades can be printed with your logo or marketing message
- Custom manufactured to the 1/4 inch

Solar Shades with clear vinyl openings
